## **Verordnung (EU) 2019/1021 persistente organische Schadstoffe (POP-VO)**

## **Regulation (EU) 2019/1021 Persistent Organic Pollutants (POP)**

Dear Sir or Madam,

this regulation deals with the prohibition and restriction of the production, placing on the market and use of **persistent organic pollutants (POP)**. It also includes restrictions on releases and the disposal of waste.

Persistent organic pollutants are characterized by their ability to

- persist in the environment for long periods of time
- accumulate through the food chain
- can be transported in the environment over long distances,
- can harm human health and the environment.

The aim of the regulation is to protect human health and the environment from POPs.

We hereby confirm that, to the best of our current knowledge, the fasteners supplied by Lederer comply with the requirements of the currently applicable POP Regulation (EU) 2019/1021, including its amendments.

If you have any further questions, please do not hesitate to contact us.

With kind regards

  
Jörg Baumann  
Head of quality management
